Figure 1: This image shows the relationship between feature-branch and main when checked out the tagged version v1.0.0.

<p>feature-branch Updated README.md</p> <ul style="list-style-type: none"> Updated the test command tweaked the program features description cleared up running instructions clearing up step 5 clearing up step 4 clearing up step 3 clearing up step 2 added more info about Ant improved description Updated README file. Tweaked the README. Updated README Updated the README [master] <code>remotes/origin/feature/zhehuan/min-calculation</code> <code>remotes/origin/master</code> Merge pull request from 'revert-1-feature/chenyue/max-cal' into 'master' add a new refine comments test Adding MaxCalculation Updata Answer.txt [revert-1-feature/zhehuan/min-calculation] Revert "Add MinCalculation" Merge pull request #1 from Chenyue-Guo/feature/zhehuan/min-calculation Add MaxCalculation [remotes/upstream/master] Updated README.md Updated the test command tweaked the program features description cleared up running instructions clearing up step 5 clearing up step 4 clearing up step 3 clearing up step 2 added more info about Ant improved description Whitespace changes only: removed tabs. Updated README file. Tweaked the README. Updated README Updated .gitignore Refactored things into BasicStats class Rehauled overrides to be first methods seen Needed to update Override annotation for controllers Updated Override annotations Large code refactoring within Views Updated the README Refactored classes and added insertion sort to BasicStats Added more comments and refactorings Placed BasicStats into its own Util folder Organized classes into directories Commented and cleaned up the source code More refactorings Removed autogenerated stubs Large refactoring for implementation using BasicStats. Added Mode View and accepts now Doubles instead of Integers Large code refactoring for model, view, and controller Added skeleton for Views Added skeletons for Controller and Model Replaced Arrays.sort with in-house bubble sort implementation Refactored code to make more readable Added test for mean Added feature and GUI for mode computation [remotes/upstream/v5.0.0] Updated the BasicStatsTest class to be consistent with the use of the Strategy pattern Modified the BasicStatsGUI class to use the new SimpleStatView class. Added the SimpleStatView class and its helper classes to apply the Strategy design pattern for the simple stat Modified the BasicStatsTest class to add the testViewUndoAllowed and testViewUndoNotAllowed methods. All tests now pass Modified the AddNumberViewController class update method to always clear itself. Extended the BasicStatsApp to support undo functionality. Modified the BasicStatsModel class to add the undo and redo methods [remotes/upstream/v4.0.0] Bug fixed the BasicStatsTest class testViewResetConfiguration method. The method now correctly handles the configuration Modified the AddNumberViewController constructor arguments Added support for testing Added the testing for the MVC design pattern Needed to commit the new maximum method. Updated the README file to briefly describe the new maximum functionality. Generated the latest javadoc Added test cases for the Model, View, and Controller. Added test cases for the new maximum functionality. Implemented the maximum functionality. Modified the BasicStats class to add the maximum method. Added the GUI class to apply the Composite design pattern. Added the simple View classes that are the C The GUI's initial configuration has all the text components be empty. The reset configuration should be the same [remotes/upstream/v3.0.0] Needed to import the BasicStats class Updated the program features Added the View interface. Modified the BasicStatsGUI class to implement the View interface. Added the gui package. Refactored the BasicStats and BasicStatsGUI classes to the gui package. Added a new BasicStateGUI class to contain the views and controllers for the MVC architecture pattern. Refactored the relevant code elements (data field and getArrayDouble method) from the BasicStatsApp class Added an initial version of the BasicStatsModel class to support the MVC architecture pattern. This class currently contains the following fields [remotes/upstream/v2.0.0] Fixed typos in the README file Added the APP_TITLE constant and used it Updated the README and build file to better support building and running the app Updated the README file to document how to build and run the app. Modified the build.xml file to be able to build the project Want to include only the source files and not the class files. v1.0.0 Added GUI functionality for mean and median Added simple window application for NotSoGood Added test for mode 	<p>René Just <rjust@users.noreply.github.com> 2017-10-31
